Renegade is an awesome game, partly because there are no "codes" for cheating.

have you ever noticed that C&C games are ther longest lasting games
mostly becues there are no ways you can cheat, hack or use a 3 person program in any C&C
games with out the game not working. other games.this proves that when a game lets people

---

cheat the player loss intrest becuse now it is too easy.

games with out the game not working. other games.this proves that when a game lets people
cheat the player loss intrest becuse now it is too easy. Guess you havent played to many C&C
games then.

The CC games for N64 and PS both had cheat codes.
Every CC game expect for Survivor(not sure if thats the name but its the top down single player online one) and Renegade have had "trainers" im not too sure about Generals....but I know before the first patch there was on +9 trainer that worked.......but yes I do agree....games are far more fun without cheats.....which makes them last longer

i have never played any C&C games on a counsol, i geuss there are trainers except none really ever worked for me.
but still there are no cheats for pc C&C games just trainers

I know of several cheats and exploits that work on RA, TS, FS, RA2, YR and GEN and I will keep my mouth closed on Rene. So yes, there are cheats and exploits for CnC games :rolleyes:

Yeah, Starcraft had a lot of cheats, and we all know that game died quick...

well star craft dint die that quickly it actully lasted very long (the servers are still up) and people still play it and billized just sets out a patch every week that keeps people from useing trainers and cheats online but people find a way to use them.
the easyest way to make an online game with no cheats it to have no cheats to beggin with,
hopefully star craft ghost will have cheats so it dies quick and renegade lives!

(i think i sound crazy hmm oh well)

wants to ruin the online game and create a world were n00bs roam freely and every match is full of aimbot accusations.

If you want to make the single player game more interesting, look for 'golden god mod 2.0' it might help.

Try to use it online and I will send some very dark and twisted Muppets round to show you the error of your ways.
 :twisted:
