Mmmm. Mars goodness. Now all you have to do is add in a temp of martians that roam the planet shooting stuff at you as your drive by.

lookin good, cant wait for realease

i like the sun affect, and the dust cloud

do u have a rough estimate when it will be done ACK?

Skier222do u have a rough estimate when it will be done ACK?

To me that sounds like the most obvious question of the week to me...

Lion @ cncden.comIt is slated for release in the near future

Please take time to read threads before posting.

Infinintits good but it looks like a desert from earth, its not red enough and there alot more rocks.  
looks nice though

You've obviously never seen the surface of Mars before... go look up some NASA archives and become informed.

if its going to be mars you have to have a rock every 3 inches and it has to be red orange or its just some desert on earth

---

---

Infinintif its going to be mars you have to have a rock every 3 inches and it has to be red orange or its just some desert on earth

Oh,

That'll be fun. :rolleyes:

To me it just looks like a big plat desert...  
To early to judge because its still in Beta...

Infinintal though i do know anything you want to know about mars i still got a pic  
the is a panoramic view from Path Finders landing craft

LOL it's so rocky--how would vehicles drive?

Anyone could do some earth desert. But the surface of mars would be out of this world!

Isn't there ice on Olympus Mons on mars? Is that going to make an appearance on this map?

That's too enormous to replicate in Renegade... The level does have patches of ice, though. They're in low-lying areas that aren't illuminated by the Sun.

There's also going to be less gravity, so infantry will be able to jump higher.

PsycoArmyi dont think theres less gravity on mars is there?

I don't know, I've never been on mars so I'm not sure.

anyway, for some strange reason I can't see the screenshots of C&C\_mars but I'm sure it will look great

i thought the gravity was practicaly identical, it might have been venus i was thinking about though, no, venus is similiar in size, mars is similiar in gravity

I don't think Mars is a very dense planet. They say the gravity is only about 1/3 that of Earth

---

mars is almost 1/3 the size of earth alone with its mass so there is less gravity

---
