Hi guys,

I warned you that I was going to address you all about all the cheating threads. I guess there's little hope now in trying to convince you that there are still no cheats in Renegade. Sadly, there are now some pretty lethal cheats. What I'm going to do now is explain the two known cheats that you're going to start seeing (if you haven't already) in the servers.

First, to those who cheat: You really and truly are ruining for yourself what could have been an awesome game. When you use either of these cheats, you will have great fun killing people left and right, for like, a day, maybe a week if you're truly pathetic. Then you'll never play again because you will move on to another game. The game without cheats is truly fun, because all skill levels can come together as a team and play. If you're a lousy shot, that's OK, because you don't need aim to sneak into the base and C4 an MCT and blow a building up.

Moving on, there are 2 known cheats in the game right now. Both very lethal. The first is the one you will see the most of. It might be mistaken as aimbot, when it actually almost eliminates the need for one. It's the bighead mod. Please don't automatically assume that if someone pulls off one or two glorious lucky headshots, they are cheating. Someone with this mod will have difficulty hitting you without it being a headshot. If sniping, they will use a Deadeye/Black Hand because they don't need the power of the ramjet rifle.

The second cheat is significantly less widespread. It's a working wallhack. You'll recognize the wallhacker because he'll be looking at walls a lot and is often shooting them. Remember some of us get bored waiting for money and we'll aimlessly shoot walls as well, but if he's getting kills while doing so, you've got yourself a wallhacker.

I will provide NO information as to where to find these cheats, or how they are created.

What can we do to stop the cheaters?

A program is being created, a collaborative effort between mac, Jonathan Wilson, Olaf Van Der Spek, and Greg Underwood (Codewench, formerly of Westwood). This program will run on the server and the client. Players who want to play on cheat-free servers will have to install a small program which checks for known and unknown cheats or else you'll be unceremoniously booted and blacklisted.

Until this application is complete, I have created a private server owner's forum where trusted server owners can collaborate where cheaters are spotted, so that banlists can be created to not really prevent, but at least deter these morons from polluting the games for those of us who have enough fun playing honestly. To gain access to this forum, you must contact me in PM stating the name of your server, WOL or GameSpy, and serious server owners will be allowed in to swap reports and spottings of cheaters.

Add to the list:

The wallhack doesn't necessarily need to be an exterior program. There are glitches which allow anyone, anywhere, to shoot through walls.

View Forum Message <> Reply to Message

I don't think you should even say what types of hacks they are, it makes them easier to figure out how to create, even if it still is hard.

I, personally, think it's enough to just let people know how to identify them, although that may make some people paranoid...

Unless the names/IP's are going directly onto a ban list, will server moderators have access to the names in order to keep a lookout for them?

Hmm....funny how everyone on here laughed at me when I said about the "big head" cheat a month or so ago.....I was basically told I was a n00b.....haha kind of ironic isnt it? I know who told me about it (Im sure Crimson knows who started it as well....but if she doesn't Ill let you know just ask) But anywho....thanks for letting everyone else know.....I sure hope there is a way to stop this.....can you use that punk buster program that games like SOF2 RTCW AA use? Hmm....hope this gets an end put to it.

   This is realy fucking bad, I play this game because, well I cant shoot too well, but with this game I could at least run in to the base with C4 and kill buildings or spend my time as a rav or pic shooting tanks - its hard to miss somthing as big as a med or apc - and I could help win games.

I do hope something is done about this. And then I can get back to playing.

It sounds like a lot of you think Renegade is going to die now...It won't, as long as the cheats aren't spread, especially when the best minds in the community are working to prevent it.

Just do your part by not telling anyone how the cheats work if you know, and not asking if you don't know.

How specific will this tool be, though?

If you want to prevent every level of cheat, that would include skins (lame stealth skins), so are you just going to dismiss skin exploits?

After all, it would be nearly impossible to create a program that can recognize any stealth skin from a stealth skin being used as an exploit.

It is not that we laughed. It is we were trying to slow down and prevent interest in the cheats that n00bs try and look for. I knew of a big head cheat along time ago. The problem with it was, that from the side the head dissapeared.

As much as I hate cheater skins, I think they should leave them alone. Blocking those could kill the mod community.

Can you clarify a bit what an "approved" skin is? Taskbot7 and I have skinned a lot of the infantry and vehicles in the game with our own personal character models, and I'd hate to not be able to use any of them just to be able to play the game now...

Subject: IMPORTANT: Information on cheaters spotted in Renegade

I'm glad it out in the open now, and what Crimson has said are the only cheats I know about.

The guy who made the wallhack was a person who use to play on the same server as me and the clan I was in. He wasn't even a modder as far as I remembered him and it came as a great suprise when he connected to the server and started shouting crap about a wallhack and the URL where you can get it. After investigation by members of our clan we found that he had indeed made a wallhack by hacking a file in the Westwood maps. At this stage the hack was reported to one of the lot over here, Blazer I think. We was hoping originally that there could be a tool built into Blaze Regulate to check for this hack.

Hopefully this can be stopped by what the guys are developing here. Although this news is shocking to a lot of you the amount of perople caught using this hack has been only two on the server I was on about, one being the author, who now has left the Renegade community.

Lets hope we can continue playing as normal.

Quote:As most of you guys know, I am a programmer. I am currently collecting information about preventing the wall hack from happening. I have came up with an idea, but that means the FDS needs to be modified in some fashion. I am currently designing some things and collecting information.

Also, I ran tests on the maps XXXXXXXXX is spreading. When I make a CRC32 of the map myself, those are different then the CRC32 of the original maps. So, now I need to write an app that sends the CRC to the server and have the server kick players that haven't sent their CRC value.

can that be done?

Subject: IMPORTANT: Information on cheaters spotted in Renegade
Posted by General Havoc on Thu, 07 Aug 2003 16:00:50 GMT

Yeah I guess thats what the guys here are trying to make with the program they are working on. The guy who posted that was the person who reported the wallhack to Blazer and the guys over here. There is a guy from Westwood anf Jonathan Wilson working on it so there more than likely to come up with something that will work.

_General Havoc

I'd love to see it too. There's definitely something dodgy going on though.

No-one gets a score of over 51000 on Mesa, with 24 players and a 45 minute time limit (he was kicked after 30 anyway). Bear in mind that the next highest score was about 3000. Even if you sat pounding the WF with an artillery for that time, you couldn't make that score.

Sorry about the image and the post Crimson. It was thanks to the clan I was in that it was discovered and reported or this could have been all around the community by now and it almost was. But I hope that the tool you guys are working on will prevent it from being used.

_General Havoc

No fear. i've been working on this program(trying to keep it a secret) every since i downloaded the speed hack and saw it worked.

once a cheat is detected it will send a message into renegade warning everyone

It semi-works it just doesnt detect some of the other cheats.

Its client-side so if jsut 1 persn on the server has it everyone cheating will be EXPOSED
Ill keep you posted

HOLY SHIT THIS SUCKS REALLY REALLY BAD.   Now what are you supposed to say when a noob says u cheat or hack or what ever cant say there are none. I dont care what exactly u guys wnt me to do I will do anything to help stop this bs!!!! :twisted: AND to any of you cheaters out there u better not let me catch u or i will make all or your lives a living hell u will never wnt to play renegade again :twisted: :twisted: :twisted: GL ON GETTING THIS DOWNLOAD TO STOP IT DONE REALLY REALLY SOON GUYS (and girls)!!!

Isnt it illigle to have those on sites??? I know most web host would shut them down if they have hacks on there!!

and.....CrimsonIf any of you have any cheats I didn't mention, PM me. Actually most of them will be stopped as a result of this program coming out, but it doesn't hurt to check.

Umm if anyone is stupid enough to have them in the first place....and wnt to ruin the game for everyone....y would they pm u and say they have hacks ???   Hey lets just hope there stupid enought to lol. :twisted:

I have My own Renegade forums, there are very few ppl on it now, but I am going to post a topic on this there, just a link to this, and maybe some discussion on the cheats, and if we can find who is useing them.And this program, does you game have to be dedicated for it to work, because I want to have this on my com if it isn't for dedicated servers only. BTW here is the links to my

Well, shit... I *have* a couple of the cheats. I don't use them. I have tried them using a different name so as not to up my own ladder score with them. Some people do want these cheats stopped.

Lets see. I play the PlanetSide Trial while this was happening. What the hell happened?

Maybe EA will get off their lazy asses and help. Dought it though.

This needs to stop.
These losers...

Wonder if this will come in handy for you Hackers when you can't get into games. Love this motto.

No Fate,
But what We Make.

Whe all you kitty cheating losers can't get into games. Use that motto.

Burn in Hell Cheaters!

ScrumfyJavaxcxScrumfyJavaxcxAdd to the list:

The wallhack doesn't necessarily need to be an exterior program. There are glitches which allow anyone, anywhere, to shoot through walls.

Yes, mister Know-it-all, who just a few days ago, denied the existence of any wallhack at all...I was ready to come to the FUD servers and show you myself

Silence you impudent worm. I was refering to a program outside of Renegade. I'm TALKING about a glitch inside Renegade.

I know what you're talking about as well, it just seems you change your mind an awful lot

Dont argue plz :rolleyes:

Hey Crimson Im skipping the replies. FYI.

Here is a link to a PICTURE of what the big head skin does.

If this is not allowed, please spare my mortal soul and simply remove it. I do not see what harm it would do to have an Image of it though, as I know how to skin (basic skinning) and I still dont see how you could do this, as you are limited to certain sizes on the skins, so It must not be a skin.

image removed

As again, if I am breaking any new set rules, I didnt know, and I really do not see what harm this could do.

Try_leeThanks Crimson, for keeping us all informed.

So who claimed their HD from Blazer for exposing these then?

I honostly dont think anyone would have gotten it, but if anyone deserves a new HD as of revealing a cheat, Its me.

Yes me.

I sent Crimson and a few other people a copy of the Speed Hack and the Death Adders click bot.

SHUSH BEFORE YOU SAY IT

So what if the Clickbot was pretty much useless? It did work, it DID auto fire and that was its intention, so therefore, its a working cheat. And if anyone decides to say that soemone else deserves it for something better, I beg to differ.

and I also take form Blazer at the time "A Working Aimbot" not "A working Big Head Set" or "A

Working Wall Hack"

Thing is I dunno if shooting it would kill..I was thinking of it. If its a skin mod, then shooting the
lower part would actually be a body shot right?

Subject: IMPORTANT: Information on cheaters spotted in Renegade
Posted by Scrumfy on Fri, 08 Aug 2003 07:41:02 GMT
View Forum Message <> Reply to Message

I was the one who revealed the working wallhack...Blazer and mac told me of other ones that
came first, though. However, they were crappy and barely worked...This one is lethal. It's like
comparing a clickbot to an aimbot...And I still haven't gotten my HD yet

If only the bastard was around who made it. I played Renegade with him many times and he was a half decent player until he goes and makes this wallhack and posts the URL all over my clans server. I have no idea what he though we would all say. I'm just very greatful we caught him when we did or it could have been all over WOL and these forums by now.

Thx general havoc for slowing this thing down. But still this saddens me. I got a new computer and discovered the beauty renegade can be when you dial up all the settings to max. But now I have to watch for people killing through walls (I am not about to worry about the head thing anyway though because there are to many good snipers that might look like it).

But that video is priceless!!!! I wish I was there!!!!

If you know so fucking much, stop acting like an ass and help all of us out. You seem to be very educated in these cheats. Why is that?

I was very educated in cheats a whiles back before the big head/wallhack were public (Which Im saying public cause we know of them, but I have never seen them anywhere). Then I went on a 10 day Vaca, got back, and WTF happened here?

K9TrooperScrumfyGeneral HavocIf only the bastard was around who made it. If you know so fucking much, stop acting like an ass and help all of us out. You seem to be very educated in these cheats. Why is that?

Because I have them. And because I'm helping mac, Blazer, and the rest of them with this program. I understand how Renegade works, I understand the loopholes, and I don't want it getting out. Which is why I'm going to be an ass and tell people not to post their "theories" about these cheats here.

Why are cheaters in this game well if they would fix the ladder i would play alot more but since the people at westwood or ea wont do anything im going to be not playing for awhile.. Intill Ea or someone will start chaging on the servers so they will actually keep getting money to make the game better.

Everything I have said is true and I don't deny any of it. I have sent what I have to mac as he requested so he can help prevent this hack from being used. I am here to help the community and not destroy it so please stop with this needless flaming. Like Crimson said, if you believe you have discovered a cheat for Renegade report it even if it is something thats been mentioned.

What I would like is to have the admins delete or lock all topics on cheaters. Again like I said, we need to regroup and work on the counter-measures. People accusing others of cheating, without solid proof are being counter productive.

PLEASE LOCK ALL THREADS ON CHEATERS AND CHEATS!
