<http://renhelp.laeubi-soft.de/laeubi.php?mode=laeubi>

I just searched google and the first one that came up was the above link to renhelp, you can find several tutorials in there that have to do with weapons.

In my signature you'll find a list of models that I've done for Renegade mod(s). I'm working on finishing my tutorial/3d portfolio site, I just have to upload around 14 MBs of screenshots for the portfolio, this portfolio will contain all notable models that I've done so far.

FerhagoHey sweet! Can I download that?

I sent it to Dante as per request when applying for a job on the RenEvo team, so I just want to wait for his reply before I put it up for download.

I highly, highly doubt that he would have any objections to me putting it up (IE - if he wanted to put it in RenEvo), but I'm just going to wait and make sure.
