Hey everyone, can we please stop with the accusations of cheating for a little bit. Crimson and us game server admins need to regroup and come up with a way to investigate these accusations. Not saying that all the accusations are BS, but we need to get a system up for reporting them. In a sence several different topics on cheaters, isn't going to cut it. If you have a gripe about a person on a server, go to the respected web page of that server. Most of the more popular servers have a web site and forum of some kind.

Lets step back and regroup please.

The only problem there is that you have to know how they work...And I don't want that getting out to the public, not even hosts of servers. Best bet is to wait for mac and his crew to get their app working.

K9 you are on the right track

whatever happened to the clearing house of banned names you had?

haremanK9 you are on the right track

whatever happened to the clearing house of banned names you had?

My list of 3000+ was lost to a virus back in February. Now I only have about 500+

Well I just started playing Renegade again after taking a break from it for a while due to the cheating that was going on. I was playing a game tonight and then I noticed that a player by the name of kddypmp was cheating. How do I know this, well he just entered the game and already he had some rediculous score. Yes he was sniping and no I don't think he is "just a good player" because of the rediculous score he had and because he would sometimes be sniping one person every second. It was rediculous. I start telling him to stop cheating and he just starts laughing and saying no. After arguing for a few minutes someone esle on the server tells me to shutup and continue playing. I said I rather not and just quit. It really pisses me off to the point where I am thinking of just uninstalling the game.

I already uninstalled it. For PlanetSide!

But now I can't find the install disk. :S

OMG LOL I just uninstalled PlanetSide or shall I say SOE SUICIDE. I was playing PS for a couple months when the other day I finally decided that I had enough of the BS in that game. Soe released a half finished product to begin with. It has so much potential but it just seems that it isn't being realized by the devs of the game. PS is riddled with bugs and there are still enough problems in game with cheaters using a corpse exploit bug that makes u invincible etc etc. TBH I don't even know where to start when it comes to PS. As well the minimum system specs on the box is below what is really needed to play the game properly. PS is also notorious for it's INSANE LAG. I kid u not, I have never seen a game lag as bad as PS. The grief system is a joke.....

It only has "Insane lag" if you dont have good specs....

I have a Geforce4 TI 128 Graphix Card, 512 MB SDRAM, and a 1.4 Ghz and it runs fine for me until I get about 50 + people / vehicles on my screen at once, then it gets a little choppy.

But when you think about it, I can play around 50 people and start to lag, and in Rene I can play around 20. All the explosions in rene make lag.

i agree with k9.

The greif System is bullshit. I've had times when People ran into and caused me to have to wait 30:00 minutes untill I could fire/Use Vehicles. Its a ok game. But. You dont have to waste $50.00 buying the game. Just get the beta.

Its not all boring.

Though the "Crash to your Desktop" bug is very annoying.
