gmax will crash every time I load any recently saved file, the only way I can open the file is if I import everything into a new file. also, I tried re-installing gmax but that didn't fix it.

It could be a recently downloaded XP update.

Have you gotten any recently?

maytridyIt could be a recently downloaded XP update.

Have you gotten any recently?

That might have something to do with it.

EDIT: I fixed it.
