Can someone please tell me when are we gonna get our patch that stops the cheaters ffs, I am getting fed up with this shit, cuz today i was playing on gamespy and this infantry guy killed 2 havocs in like 10 seconds, mofo had aimbot, he got kicked and banned from the server but I am not gonna name him cuz the admin of this forum will for sure delete my thread. But those people out there working on the Anti-Cheat thing, please work a lil faster and release us from this messed up situation.

For the Healty C&C community and to the death of Cheaters (cheeeers)

whats so bad about saying the cheaters name, then he gets banned from all the servers and thats one less cheater

think it was dante who was doing to anti cheater program thing, and from my poibnt of veiw hes got all lot to do right now with like the ren alert mod and dead 6 expansion.

me and a few other guys have been working on a thing but it isent going well, we need some more programmers.

you can wait on EA to do anything about it, thay where probibly hoping for this to happen so thay have a reson to shut the ren servers down

I think when something is affecting you it seems like ages. But real progress is being made.

For obvious reasons I cannot say exactly what has been discovered about the exploits, however right now I have been trying to get hold of some of the people at EA. Right now a lot of the them are moving to LA and are busy with various projects. I have emailed quite a few people there for some help. Rest assured though people in the community are still working hard on this.

Infinintwhats so bad about saying the cheaters name, then he gets banned from all the servers and thats one less cheater

Because legitimately Owning snipers don't want to get unjustly banned because of a Newbs/N00bs rumor.....
