HEY all,

My renegade crashes too many times now, it used to do that, but not frequently, but now it crashes like mad, like 5 times in a game....

Its the same thing as for battlefield 1942, but not for any other games i play...

HELP PLEAZ!!!!

I get this too. I freezes for a few seconds, then says "Gemeplay is pending" then it kicks me out to the main lobby. I don't know what to do, I learn to live with it. I think it was the new memory I installed, but there is nothing I can do about it.
