  You want allow your visitors to Upload screens/files to your site?
  You want an easy way to upload screenshots/files to your webspace without conecting every time to your FTP?
  You want to upload files/images to your space from everywhere in the world??

Than this skript I wrote is your choice it that allows to upload images and files.
After every Upload a link of the uploaded file is provided also an IMG tag for inserting into bords.
At the mainpage there is a preview of all uploaded images if you click on them the orgial images is showed, uploaded nonimagefiles files are marked as nonimagefiles and a downloadlink for the file is showed.
You can select between save mode (that means only the Admin can upload files) or normal mode (everybody can upload files).

- It is now also posible to add comments after upload -

The Admin can also delete uploaded files.
You can also setup:
* maximum size for Upload (KB)
* with of the Admin previe Images
* with of the previews at the main page

You can view an example at: www.imageupload.de.vu
(on some times the server is slow, but I ahve no better host for that)

You need only an PHP supporting webspace, no database is needed!

  You can download the script here

Hey, that works pretty good!

Do you have anything that that limits the type of files that someone can upload? For security purposes you wouldn't want anyone putting a .exe with that DIR's CMOD set to 777.
Might be something for the next version.

It says:

Parse error: parse error, unexpected $ in /home/virtual/site66/fst/var/www/html/potw/index.php on line 253

---

check your config.php
every line must be termianted by an ; eg $user="test";
text thats after an # is a comment eg #commet
If that don't help plz post, when this error acoured (startup, upload etc.)

```php
<?php
# Insert the Url where you uploaded the script.
$url="http://cncdaily.nucleardays.com,"; # please no / at the end!
# Select Username and Password for the Admin
$benutzer="cncdailyadmin";
$passwort="****";
$max="1000"; #maximum size for Upload (KB)
$adminx="300"; #with of the Admin previe Images
$userx="200"; #with of the Previews at the main page
$safemode="on"; #if switched to "on" only the Admin can upload files
php?>
```

Seems fine to me?

**** is there for the forums!

Cpo64DaveGMMOR, for images you can use the n00bstories image uploader

I think he is refering to if you wanted somthing like that on you own site.

My mistake

Quote:nucleardays.com,"; # please
Remove the: , (komma) at the end.
But thats not the Problem, there was a fault in the php files, redownalod the file.

Remove the: , (komma) at the end.
But thats not the Problem, there was a fault in the php files, redownalod the file.

Thank you for the help and also for helping me customize the css...

This is a very good skript you should try it because it is free and so easy to set up...

Thanks again Laeubi. Check it out here:

My Upload Terminal << Username = cncdailyadmin Pass = ****

Sorry can't let you upload i am using it as a POTW skript.

The problem was here:

--> php?>

The closing tag should be ?>, not php?>.

CrimsonThe problem was here:

--> php?>

The closing tag should be ?>, not php?>.

I have alredy fixed the error, may you ahve downlaoded the fixed version, and btw. these are the posibilyties for closing tag:

php?> = Full tag
?> = short tag

But the short tag must be enabled by the serverprovider so i recommend to use the longer tag to prevent probelms with server that disable the "allow short tag" in the config

Quote:short_open_tag = On ; allow the <? tag. otherwise, only <?php and <script> tags are recognized.
(I cut that out of my PHP.ini config if you do not belive me   )
and the same way also the closing tag works with the long and with the short version.

But thanks that you tried to help
What do you think about the skript? I'm just new at PHP Skripting and I heard you ahve a big knowledge of this language.

LaeubiWhat do you think about the skript? I'm just new at PHP Skripting and I heard you ahve a big knowledge of this language.

She shaw does I belive look at:

http://www.n00bstories.com

http://www.crimsontechsolutions.com

http://www.n00bstories.com/RSW

and these forums all done by Crimson maybenot completely without support but mainly by Crimson ...

Crimson is the 0wn4ge pure and simple!!!

I have to respectfully disagree. You do NOT use "php?>" as an ending tag. It's not valid syntax.

http://www.php.net/manual/en/language.basic-syntax.php

Your choices are:

<?php ... ?>
<script language="php"> ... </script>
<? ... ?> (if short tags are enabled in php.ini)
<% ... %> (is asp-style tags are enabled)

I didn't download the script because I have already written a more comprehensive PHP script for this same purpose as you see in the Image Uploader. The only reason files aren't allowed is because my web host doesn't allow me to be a file server and if I allowed files to be uploaded, I could lose my account.

But the other closing tag also works as you can see here:
http://www.imageupload.de.vu
and here:
http://cncdaily.nucleardays.com/potw/
and here:
http://www.ik-skript.de.vu/familie

All these scripts using the <?php as open and the php?> as closing tag.

The parse error was occured, because I forget one \ before an " :oops:

But I'll use the ?> for closing from now on, because it is shorter

Subject: Hmm whats this do?
Posted by Boink-Your-Dead on Wed, 26 Mar 2003 19:03:50 GMT
View Forum Message <> Reply to Message

Just installed it I love it...

POTD could do with a next and previous button though and I hope you get next and previous when there gets lots of images...

The uploader would be kool with a Date of Uplaod attachent this could also go under or above the POTD saying when that POTD was uploaded.
