Belive me I am no graphics jockie , but those any good?

Bored doesn't describe how I feel now .

I have a very dodgy flatscreen monitor and I was sorted slouched when looking at the pics and when you look at my monitor from different angles the levels of black increase/decrease, thus it looked perfect for me and I didn't notice the green.

The fact that the ladder is up is awesome and the signatures rock (like how u used mine, kick my theme song) but if it was EA who fixed the ladder which I am led to believe it was theres just too many cheaters out there for it be something to enjoy. Im not trying to belittle any of what you have accomplished, it sure as hell rocks but when people have 3,000 in 30 games or so it kind of defeats the purpose. Especially with servers like afterfive and such which do not have any moderators to my knowledge to stop cheaters.

Oh well, great work regardless. RENEGADE lives ON!!!

Here are smaller versions (filesize, not dimensions):

was: 22KB is: 5KB

I saved around 90% of wasted kilobytes - and kept the filenames so you can just replace the big ones with them

You made a good point Warranto... Engineers don't make enough points unless you attack buildings with them. It's frustrating to see yourself at the bottom of the scoreboard when you know that your team would have lost if it wasn't for you placing proxy mines and such. Also, although you get a steady stream of points for repairing buildings, you get almost no points for repairing vehicles - you only get credits. If you care about your rank there isn't much of an incentive to be an engineer repairing tanks on the front line

Well as long as crimson has uploaded them then you should be able to use them. Also I think the PHP file needs a \$_GET added for the image code. But basically you need the logo's code like "nod02" then add it into the URL.

http://www.n00bstories.com/stats/renegade_stats.php?player=cowmisfit&team=nod

The part in italics you should change to the new logo's ID.

Strange....

Would it be possible to run the script on our server as well?

I'd like to make these images with stats available for our users w/o stealing your traffic and bandwidth.

OK, I looked into the problem....

The image is created by a PHP script. The base of the image is the ~5kb file, then he add stuff (text) to it. The final size is a bit bigger than that. Nothing is wrong...

May I have the script, please?

I wasn't answering your question.

But you'll have to ask Dante. He created the script, I'm just hosting it for him. It's not my place to share it.
