This question has been bugging me for a VERY long time. Although there could be a rational explanation for it, I need a person who is working on the project to answer this question.....

When is RenAlert going to be released?

I remember a few months back that the community was buzzing with excitement when it was announced that RenAlert was going to be released. Then it was recalled a few days for repairs on two of the three maps that were going to be released. They said that it would take a few days, and that it would be released as soon as it was fixed.

But it never was.

Now I ask, when IS it going to be released? I don't want to sound like a pain in the ass, but I am dying to know.

Thank you for your time.

****EDIT**** The answer to my question has been posted below. I will change the topic to "All-Out Flame Thread" to keep the people happy and entertained.

Dante

OMFG, WHEN IS RENALERT COMING OUT!!!

As always said, when its done, we can only speculate times when it will come out (and have said "pending no major fuckups"), guess what, we had a major fuckup, it is fixed, and is being finalized for a public release, now, with this being said, remember 2 things, i have a life, i am a busy person.

Scratch what I said earlier, I just read this on another thread. Now that the question is answered, this thread can be turned into an all-out flame thread to whomever you choose.

<http://www.renegadeforums.com/viewtopic.php?t=7409> <-- This is the link where Dante talks about RenAlert, for the curious.
