Looks like the same webpage that was up a few months ago to me. And by the way, you're supposed to be coming here for updates. There have never been any updates on the webpage.

Quote:Each piece of RenGuard is being worked on daily, and the progress is as rapid as we can make it. Sign up on the RenGuard Forums to be notified by email when RenGuard is ready for download.

That's the best you get. I am curious as to the status of this project. I've heard that you have a new guy that replaced the "motherboard problem child". ETA?

Subject: hmmz oke someday i`ll se renguard on the internet over.....

you have to see it to believe it? Well, just to give yourself an education... YES there are things called atoms, YES there are things called viruses, and YES there are people in other places. Just because you've never seen any of them doesn't mean they don't exist.

Mobius show a little respect will you. Renguard is being created here for free, off peoples own backs, spending their own free time to make your gameplay experience wanker free.

It will be released when its ready.

He's entitled to his opinion and you're entitled to yours. I think we've ALL beat this horse enough.

;-P

Hey, Warranto, just for arguments sake (lol) maybe he's seen atoms, viruses, and 'other people' on TV or under the microscope and thus believes in that? Plenty of proof those things exists. Just a weak argument that I HAD to jump on.

More senseless trash from the same retard who thought Crimson created the cheats.

You, sir, are an insult to humanity. There should be a petition asking God (or whatever celestial being you believe in) to apologize for allowing such a grotesque example of Homo sapiens to roam the earth.

Have a nice day.

fI00d3dHey, Warranto, just for arguments sake (lol) maybe he's seen atoms, viruses, and 'other people' on TV or under the microscope and thus believes in that? Plenty of proof those things exists. Just a weak argument that I HAD to jump on.

Ah, but I've seen God etc. on TV, and to bring it up, pictures as well. And if he's seen it under the microscope, you can only say that if you assume the microscope is working, and hasn't been tampered with. My point was, just because you haven't seen it, doesn't mean it's not there.

Well, enough of this "argueing", at least in this topic.
