Lets see I've only gotten one double headshot and it was against a Sakura and Black Hand sniper using Deadeye. And a few double kills with the ramjet.

One kill I aimed at and engineer from far away with a PIC and a Technician walked out at the last second and he got killed too.

Another time I was Havoc and I saw a sbh just right before he disappeared. About 10 seconds later I aimed where I thought he would be if he had kept walking in a strait line. I pulled the trigger and nothing. I fired again and hit him, and I saw him change direction. I'm sure he was thinking wtf, but he never said a word. Just when I thought I had lost him he started shooing at me...mistake.

But the shot that even tops them all was the time my FPS dropped to 2 (it said 2 but it was more like 1.5!). I was thinking oh piss he's gonna kill me, then I pull the trigger and boink. I didn't even see the frame where I aimed at him.

The best one I have seen included me being a deadeye a Nod engy and a Black Hand sniper. I had my scope on and seen a sniper standing by the Nod side bunker on mesa. Well I pulled the trigger and right at that moment a Nod engy jumped and the bullet skimmed the top of his head killing the engy and then entering the BH sniper. I don't know how it happened, but it happened and it was great.

Hmmm... my best shot.

It was on City Flying. Me and this other guy on Nod were shooting down Orca's. Well there was one that we both aimed at. He shot and then I shot a hair of a second after. He destroyed the Orca and I killed the guy inside in mid-air. I don't think I'm gonna be making a shot like that again any time soon.

Hourglass.

I was a Raveshaw at the tunnel entrance in our base. I see a Engie coming from around the corner. I wait a few seconds and pop out and fire. The round goes through him and the 3 other engies in line behind him. They though it was c4 at first.

Never had anything that good since.

ROFL! 4 kills with one shot

I myself once killed two mutant Raveshaws (i.e. with the alt. skin) with one b headshot from my \$500 sniper rifle. I was on 56k back then, my FPS was quite horrid, and it was across the Nod base. I was on the HoN side of the Nod base on Mesa, by that ramp, and the Raveshaw's were across the base at the Nod PP...

Another one was on C&C\_City\_Flying. I was Nod, and GDI's AGT was down. I was a Sakura and was shooting from the roof of the WF. After a while two pissed GDI's come on the roof and start attacking me. I fail to kill them initially, until I managed to kill both of them with one shot, while they weren't lined up! It was probably lag, but on my screen one of the two was about a meter more to the left than the other one...it was very strange.

just yesterday on islands i was a howire in a med. nod only had their airstrip left. so i go in along the hand. my med dies, and i go into the strip. i place a timed C4 by the entrance. i then go into the strip and manage to lay a timed C4 on anohter guys leg. well a few seconds later, \*boink\* tripple kill. \*boink\* anohter kill

i also killed 2 guys with a raveshaw on Mesa. i think that 1 was standing in the AGT.

Another Accidental SBH kill for me. It was Islands in the pits servers. I was having a sniper duel with x50cent, me by the GDI refinery, him by the tunnel enterances. The usual stuff occures, jinking back and forth trying to headshot him, low and behold I miss him only to hear a \*boink\*. I see an SBH appear followed by the words warranto killed Gizbotvas.

Ok, well i was on city flying and i had a buggy and only 4 minute in the game with every building still up. I was driving on the bridge when i spotted a havoc that was shooting blindly at the harvester so i drove off the bridge and killed a bunch of gunners that were rushing some survived though and killed me. Every one was all wtf and nod won by about 1000+ points. This was back in the day before cheats.

This probably dosent count as a shot cuz it was with C4. I was at my freinds house with my comp, bolth of us connected to him cable line. So for some reson just to be funny I geuss he puts some timed C4 on my stelh tank on islands map. So i and start shooting at their so its almost dead and im shooting at it and start getting shot at by a med and what do ya know and enginer jumps in just before its about to die. So im practicly screwed, but then the C4 on the side of my stelh tank explodes killing the ref just before the med killed my stelh tank. The only bad thing was my freind got the kill points

Can't say that's skill, it's luck.

my best shot ever was complete and utter luck, and it was like a year ago too. I was on field, and I was a sakura killing the gdi people that were attacking the airfield through the back tunnel. They were doing a rush on the airfield, and I popped up and took 1 shot at a havoc, it went through the havoc's head, into a gunner's head (who was directly behind him), then redirected into 3 grenadiers. I went into I33t shock and passed out.

oh, and this happened a few times too. I'd be shooting a tank with a sniper, and then another tank would blow it up just before my bullet hit it, and I'd kill the guy inside. That's kinda luck too...

That's not possible Sniper rounds can only go through 2 people.

BlazerThe weapons that can kill more than one person in a row (go through one body and hit another) are: ChemSprayer(3), Flamethrower(2), PIC(10), Railgun(10), SniperRifle(2)

That's from Blazer's info in this thread: <http://www.renegadeforums.com/viewtopic.php?t=8185> and the weapons info can be found here: [http://www.n00bstories.com/hosted\\_files/RenStats.html](http://www.n00bstories.com/hosted_files/RenStats.html)

wrong, it happens all the time. After it hits 2 people it doesn't completely stop, it just goes haywire, most of the time hitting the ceiling or a nearby wall. But every so often it will hit that odd person. I've been a victim to 3 person killing (and the guy wasn't cheating). Hell, sometimes after it hits the first person it does haywire.

When this happens nowadays, people's first reaction is "OMG LYKE U CHEATOR!!!", but back in the good ol' days (before cheats) people's reactions went something like "wow, ns!"

I forget where it was posted, but a regular sniper round can only go through 2 people, a ramjet round can go through more. And a PIC/Railgun round can go through about 10 people.

go into a game, buy a sniper, walk up to sumone inside a building on your team, then shoot them in the head. It wont hit the wall diffectly behind their head, it will change direction when it goes through their head. the same thing happens after weapons meet the maximum amount of infatry they can go through.

Ok, I'm not often a Sniper but my best was on Field, I'm as a Med Tank, driving out the base and shot to nowhere, but hitting exactly an StealthTank... I kept on shooting at him, because he don't move/shoot back (why ever) then I wanted to drive my way to the Nod base, shot another random shot in the direction i was currently driven and WTF? Killed a SBH and enlightened another Stelktank.. that was real horroshow.!!! :twisted: :twisted: :twisted:
