Hi,

I'm looking for a good web host. I need to following....

So far Hosting4clans.com is winning, with a \$12/month offer for unlimited transfer and space.

Thanks for any help.

On seconds thought.. 100 GB? You won't get that anywhere unless you buy a Dedicated Shell..

P.S. Nothing is ever Unlimited.

100 GB of bandwidth seems sort of extensive for a website. It would have to be one hell of a website to use that amount of bandwidth.

Just to add, there is no such thing as unlimited bandwidth.

Only unmetered, and trust me, if you start pushing more then 20K/s average a month on a \$12 account they will either charge you more or demand more.

They are. I have purchased an account with them last week (25 euros one off fee) and the service is great. I have had no problems with them yet.
