I downloaded brenbot and changed the .cfg file but if i start brenbot it logs into the irc but doesn't do anything after that. Can you help me??

this is how it looks:
BRenBot 1.31 MSWin32.
brenbot is Copyright 2003-2004 by Daniel Herda & Charles Jones. All Rights reserved.

It's not supposed todo anything after that.

It waits for commands and outputs the game logfiles in IRC.

Edit brenbot.cfg and put in the remote admin settings. Also, be sure to read the Readme. Your FDS has already be able to receive commands from renrem for this to work.

Also it will not listen to anyone on IRC unless it "sees" them get +v, +h or +o.
