Hey guys/girls i have a question, since most of the people here are pretty well-known with Renegade and servers i think this is the best place to ask.

There are some servers running Mods that are ONLY server-sided, meaning that the players connecting to it dont have to download it before they can join - like this Sniper-Only Mod - .
On some other servers they run a Mod that does:
When you kill a Havoc (for example) he drops his Ramjet, a C4, Cash or an armor upgrade. i LOVE this mod and would like to have it on our own server too (30 player AOW, 2 x 10 Player AOW and a 12 Player Snipe Only @ euro). Does anyone know where i can get this or anyone who wants to upload it to me?

Thanks

[zunnie]
