I havent tried this myself because i already have 3 serials (no you cant have one ) i use them all.

You COULD try to email a company that rents Renegade Servers , like <http://www.gameservers.net> , you could try to email their techinal support. My guess is that they have "tons" of serials because they MUST have one in order to setup a server if someone wants to rent one. Email them, explain them your problem and ask if they would want to send you one.

It may work, its worth a try, it sounds a bit stupid though but it may work.

I doubt they'll give them out. If anything, they'll porbably try to get me to rent a server from them...

Thanks for the help though..

Still looking...
