i know one of the guys who made a fake rengaurd, it is not 123 kb now it is much bigger, on the UI it has Patch Now, DO NOT, click that button, it will wipe most of your needed windows files, it is made in visual basic, the code is

on error do next or summat
kill "system32files"
on error do next
kill "another system32 file"

at least thats what he told me it did
it has various spelling mistakes in it so far, and the maker is making it into an install file!

Right now it is called RenGuard_Final
_2.6

The version he sent me was 136kb

if theres anything else u wanna know post here and ill tell u as much a i can[/code]

That program looks shite.

The Renguard team will most prob come out with something that looks a lot better than that peice of crap.... I hope.

Don't forget ilegable.
You'd have to be an idiot to think that was RenGuard.

LOL, it's plagued with spelling and grammar mistakes.

Dam these VB kiddies!

If you believe that BS and are convinced by that greatly flawed statements, you deserve to have critical system files on your computer deleted.

"flying penis mobile"

sounds like something out of the ambiguously gay duo (saturday night live).
