I'm averaging maybe 3 kbps on it...3 hours left at 70%...10% an hour if I'm lucky...I guess they
have bandwidth issues...probably weren't expecting this many people all at once

I'm d/ling from the mirror they posted on Ren Realm. It's going at 50kbps, I'm on a 576kbps broadband connection, so it may be faster for better connections.

I'm getting 62.3K/s. Anyway you can get the custom scripts needed for the mod from http://www.renevo.com/downloads/sp1_0_1.zip they also include an installer so you can't mess things up. The file is only 700 kb or so.

The soviet tesla coil 0wned everything that comes within range. I liked the V2 rocket launcher though, a rush of 3 of them and they could take out the enemy base easily with 2 shots each.

BETA
TRHAT IS WHAT IT IS!!! THE FULL THING IS NOT YET OUT!!! THERE IS GONNA BE MORE

MAPS, MORE CHARACTERS LESS BUGS, MORE VEHICLES(maybe, im not sure)MORE GOODNESS!!! This BETA was never MEANT to be critisized simply to ammuse our need for knowledge long enough to gt off the mod teams backs so that they can work in PEACE. again this is a BETA filled with bugs, you report em to ACK ofver at Renegade Realm(or some sort of e-mail) and than the FULL version of it will be BETTER with LESS bugs and BETTER ameplay wit BETTER models and BETTER everything get my drift?!
now=Beta=Buggy
later=Full Version=Excellent
so STFU and PLEASE STOP CRITSIZING THE THING just report bugs and be happy you got the chance to take part in an expected reveloution to Command & Conquer Renegade.(feel free to flame that all you want but as far as im concerned that is all that matters so suck it up!)

WE KNOW!!!!

IT STILL SUX NO OFFENCE...

what is the difference between this and renegade???? well lets see... ra1 characters, ra1 vehicles, ra1 buildings.... thats all??? i mean what is so hard about making that??? and it has problems with playing online... on GSA hardly anyone can play the mod...

i sure hope the full is better cause then no one will play this mod.

If it's so easy to make good vehicles, buildings, and especially characters, why haven't you been able to make anything decent yet?

WHat's so hard about the models? Nothing. What's so hard about skinning them with original

textures.. I don't know.
