start>programs>startup>xcc mixer>BELETED!

i dunno anything other than that...
i dont even have xcc mixer....

nah i meant when u start the program it scans all the .mix's in the folder

I just want to open the program and then open a .mix manually

Don't go bothering Olaf. Just go to the XCC website and use your eyes. It tells you if you go and look for it.

thanks havoc....i tried the html that comes with the program but it was a dead link,....i'll try this one

This is no big deal...i really need help with my elevator for my map(see my other thread if you can help)

i found it in the forums....just use the shift key(disable scan) if you have problems with the xcc mixer locking up during startup!
