That file name sounds wrong for a server. You are running on Linux right? or Windows?

Seriously, buy a book. webmin is NO administration utlity, this is for newbies.

First, running the renegade server from your "Kommandozeile" (Commandline) will not work. You need to login via SSH. Download putty (google for it), and connect to your server.

Then, extract the server. If your filename is renegade.tar.gz, you can extract it with tar xzvf renegade.tar.gz

Then, you just execute it by ./renegade, or whatever the executable filename is. Be sure to read the FDS' README.

Buggyyes, but how can I start Putty?
THX for answers

Download it, and _run_ the exe file. It's just a normal windows exe file that you need to execute.

hi, sry, I can not connect with putty to my server. Can I install the server about otherways? If I will start renegade_server_1037b_rh8-0 with the command ./renegade_server_1037b_rh8-0 at the console of Webmin I get:
> cd /home/cncre/
> ./renegade_server_1037b_rh8-0
Error initializing non-canonical I/O mode

What can I do? I need your help very fast, thx

> ./renegade_server_1037b_rh8-0
Error initializing non-canonical I/O mode

What can I do? I need your help very fast, thx

Use the "SSH" option when connecting with putty, not "telnet". You need a real console, and that is putty. Webmin console will not work.

But how can I bulit SSH? I don't know. If I will start the SSH Server on Webmin it shows: Der SSH Server konnte nicht gestartet werden : 8462: Bad owner or mode for /var/lib/empty ? What can I do?
thx for answers!

SSH is already started. You do not need to start it. I have never seen a server without SSH!!

Just connect to it, or ask your hoster to enable SSH for you

yes i can login on the server with https://213.239.201.143:10000 to Webmin.https is ssh, or not?
If I want to start SSH on Server with Webmin it shows me: "Der SSH Server konnte nicht gestartet werden : 15826: Bad owner or mode for /var/lib/empty"
Why? And If want to connect to the server with putty (213.239.201.143:22) it shows me: "Network Error: Connection refused"

Ask your hoster to enable SSH for you. Change the hoster, if they won't enable SSH for you. This is something that is STANDARD on every linux machine. If it has no SSH; you cannot really call it a linux box.

Well, I have testet renegade_server_1037b_rh7-3 , it runs. But If I start
./renegade_server_1037b_rh7-3 with the Commandobox at Webmin it shows me nothing ist starts but than nothing.
> cd /home/Server/
> ./renegade_server_1037b_rh7-3

Why??
